12bn+ Reach
Mobile wallets and local bank accounts in 140+ countries.

0 New integration
Banks send the pacs.008 / MT103 messages they already use.

E2E Control
Swift GPI tracking end to end, with built-in AML and sanctions screening.

3 Agenda & discussion topics

TIME	SESSION	DISCUSSION POINTS
00–10	**Welcome and tour de table**	▪ Each bank's top cross-border payments priority for 2027.
10–20	**Where cross-border payments are going**	▪ ISO 20022 after the end of MT coexistence: what changes for CEE banks? ▪ Swift GPI and instant cross-border: what do clients now expect? ▪ How does Swift reach wallets and non-bank endpoints?
20–35	**Use case: how a global tier-1 bank extends its reach with Thunes** KEY SESSION	▪ J.P. Morgan Payments chose Thunes to expand cross-border payouts (Xpedite Remit, Sept 2026). ▪ Real-time payouts to bank accounts and mobile wallets, 24/7, from a single connection. ▪ First use cases: supplier settlements, bill payments and remittances. ▪ What a CEE bank can take from this model, and how Swift Connect delivers it over existing rails.
35–50	**The last mile: who your customers pay**	▪ Which corridors matter most: diaspora flows, Asia and Africa for corporates and workers? ▪ Where do payments fail, get delayed or leak to fintechs today?
50–65	**Build, partner or wait?**	▪ Cost and time of building wallet payouts vs using existing Swift rails. ▪ Compliance appetite for wallet endpoints. ▪ FX and pricing transparency as a competitive lever.
65–75	**Takeaways and next steps**	▪ One takeaway per bank. ▪ Interest in 1:1 follow-up with Thunes.
